ABOUT ME

Full Stack Developer with a Computer Science Engineering degree and strong expertise in frontend, backend, and UX/UI design. Proven track record in building complete web applications using modern technologies including React, Next.js, Node.js, Python, Django, and Spring Boot. Skilled in creating efficient, scalable solutions with a focus on user experience and clean, performant code. Passionate about leveraging both frontend and backend technologies to deliver comprehensive digital solutions.

EDUCATION

UNIVERSITY OF INFORMATICS SCIENCES (UCI), HAVANA, CUBA — 2021–2024

- Computer Science Engineering

WORK EXPERIENCE

FullStack Developer – Freelancer

FEBRUARY 2022–MAY 2025

- Developed full-stack web applications using React with TypeScript and Redux for global state management, implementing strongly typed components, custom hooks, and RESTful APIs secured with JWT authentication.
- Built REST APIs using Node.js and Express, developed GraphQL gateways for data aggregation across microservices, and created user, booking, and payment management APIs with authentication and validation.
- Containerized services with Docker and worked with Kubernetes for microservice orchestration, configuring deployments, services, health checks, and autoscaling in both development and production environments.
- Implemented unit tests with Jest and React Testing Library, end-to-end tests with Cypress, and applied TDD to critical modules such as complex validations and business logic.
- Configured CI/CD pipelines with GitHub Actions and GitLab CI to run tests and linters, build Docker images, and perform automated deployments on AWS (EC2, S3, RDS).
- Worked within agile methodologies (Scrum/Kanban) with 2-week sprints, daily standups, planning sessions, and retrospectives, and performed code reviews following Clean Code and SOLID principles.

FullStack Developer – Cimatel

May 2025–February 2026

- Developed a complete enterprise management system from scratch using Python and Django, handling the entire project architecture from backend to frontend.
- Implemented the system to support over 200 active users, ensuring scalability, performance, and stability in a production environment.
- Handled continuous system maintenance, resolving incidents, optimizing code, and adding new features based on business needs.
- Worked with Django REST Framework to create efficient and secure RESTful APIs, integrating databases and ensuring data integrity.

CERTIFICATIONS

JAVASCRIPT ALGORITHMS AND DATA STRUCTURES – FREECODECAMP

March 2022–April 2022

RESPONSIVE WEB DESIGN – FREECODECAMP

May 2023–June 2023

CERTIFICACIÓN DE CURSO DE DISEÑO UX/UI – ESCUELA DIGITAL

Sept 2024

FULL STACK DEVELOPER CERTIFICATION – FREECODECAMP

April 2024 – July 2024

AGILE & SCRUM FUNDAMENTALS – COURSERA (GOOGLE)

Aug 2025 – Nov 2026

AUTOMATED TESTING WITH JEST & CYPRESS – UDEMY

Nov 2026 – Jan 2026

SKILLS

Soft Skills:

- Analytical focus and thinking.
- Clear understanding of business requirements.
- Strong problem-solving skills.
- Ability to work in teams.
- Good communication and clear language.
- Curiosity to learn new technologies and trends.

Frontend Development

- HTML
- CSS
- JavaScript
- React
- Next.js
- Tailwind CSS
- Node.js
- Express

Backend Development

- Spring Boot
- Django
- MySQL
- PostgreSQL
- MongoDB

Programming Languages

- Java
- C++
- Python

UX/UI Design Tools

- Figma
- Photoshop
- Adobe Illustrator

LANGUAGES

- Spanish(Native)
- English(Fluent)
